Attempt strategy

Build around passage comprehension, elimination, pacing, and confidence. Use the [official question format](#) as your baseline.

Prepare across all five sections

Keep the preparation complete, not concentrated in one comfortable area.

English

Read closely, identify arguments, infer meaning, and summarise.

Current affairs

Follow important developments and connect events to wider implications.

Legal reasoning

Apply the principle provided to the facts given.

Logical reasoning

Test assumptions, evidence, conclusions, and contradictions.

Quantitative techniques

Interpret data and calculate accurately under time pressure.

Keep it complete

Use the [official syllabus](#) to guide preparation.

Use a repeatable learn–practise–review cycle

Each round turns a mistake into a more specific next action.

Diagnose

Take a timed paper and identify section-level strengths and weaknesses.

Review

Record the error, its cause, and the lesson in an error notebook.

Learn

Revise the underlying concept, passage type, or solving method.

Measure

Track accuracy, time, recurring mistakes, and improvement over time.

Practise

Apply it through timed questions and previous-year papers.

Mock tests turn preparation into evidence

A score is one signal. The review explains what to do next.

01	02
Measure	Classify
Review section accuracy, time taken, unanswered questions, and error patterns.	Separate mistakes caused by misunderstanding, rushing, weak concepts, or guessing.

03	04
Adjust	Sustain
Change the timetable based on evidence, not on one disappointing result.	Consistency, sleep, and realistic weekly planning support sustainable improvement.

REVIEW THE PATTERN

Every mock should leave you with a clearer next week.

Choose coaching for structure, feedback, and fit

Ask what is included

Capabilities that travel
