

Sonalika 50–60 HP Tractors: Models, Prices and Features

Sonalika offers tractors in different power categories to meet the requirements of Indian farmers. The range includes models such as Sonalika DI 50, DI 55, DI 60, Sonalika 745, Sonalika 750, and other models designed for different agricultural applications.

The **Sonalika tractor price 60 HP** category is useful for farmers searching for higher-power tractors for demanding field operations. Similarly, farmers can explore models in the 50 HP and 55 HP categories according to their workload and implement requirements. Prices vary depending on the model, specifications, transmission, features, and drive configuration.

Sonalika tractors can be used for ploughing, cultivation, sowing, transportation, and operating suitable agricultural implements. Farmers can compare engine power, transmission, PTO, hydraulics, lifting capacity, mileage, and other specifications before selecting a model.

The **Sonalika tractor 4x4** range can also be considered where four-wheel-drive capability is required for particular field conditions and applications.

On this page, you can explore Sonalika [tractor](#) models, prices, horsepower, specifications, mileage, transmission details, and key features. Compare the available models based on land size, soil conditions, farming operations, required implements, and budget.
